Name Writing Book

How to Edit:

To create the name books, you must first open this document in Adobe Reader. If you don't have it on your computer, you can download it for free [HERE](#). If you are using a Mac, make sure you are not opening this with Preview.

After opening in Adobe Reader, go to the "class list" on page 8. Enter one name per box. The name books will auto populate with each student's name. You can add 20 names at a time. If you need more, print out the books you created, then delete the names and add new ones.
